Audio & Video Production Service Sheet

Audio Equipment

RØDECaster Pro II - Integrated Audio Production Console

A cutting-edge all-in-one production studio designed specifically for professional podcasting, broadcast audio, live streaming, and hybrid events.

Features include:

- 4 high-quality mic preamps with studio-grade audio processing
- Multitrack recording direct to microSD or computer via USB
- Customizable sound pads for triggering effects, music beds, or stingers
- Bluetooth, USB, and 3.5mm TRRS inputs for remote call-ins and device integration

Use Cases: Live podcasts, multi-host interviews, remote guest integration, hybrid panels

RØDE Wireless PRO (Dual Channel Wireless Lavalier System)

A state-of-the-art wireless microphone kit, ideal for capturing clean, broadcast-quality audio from two speakers simultaneously. Includes internal 32-bit float onboard recording as a fail-safe.

Features include:

- Two ultra-compact transmitters with built-in microphones and lav inputs
- 32GB internal storage per transmitter for backup recording
- Timecode sync and GainAssist for seamless post-production alignment
- Up to 260m (850ft) transmission range with advanced encryption

Use Cases: Mobile interviews, documentary shoots, dual-host vlogs, corporate presentations

4 x Dynamic Broadcast Microphones (with Professional Boom Arms)

Four studio-grade dynamic microphones designed for crystal-clear voice capture and noise rejection, mounted on fully adjustable boom arms for optimal positioning.

Features include:

- Cardioid polar pattern for focused vocal pickup
- Shock-mounted capsules to minimize handling noise
- Boom arms with 360° rotation for flexibility and ergonomic setup
- Pop filters and windshields included

Use Cases: Roundtable podcasts, panel discussions, voiceovers, remote interviews

High-performance headphones tailored for real-time audio monitoring during production and recording.

Features include:

- Closed-back design to reduce audio bleed and provide isolation
- Comfortable over-ear cushions for extended sessions
- Accurate frequency response for critical listening
- Individually volume-controlled headphone outputs (via RØDECaster Pro II)

Use Cases: Podcast monitoring, sound checks, live production, voiceover sessions

% Video Equipment Overview

Sony A7 IV (Full-Frame Mirrorless Camera)

A highly versatile 4K full-frame mirrorless camera designed for cinematic-quality visuals — perfect for A-roll and main subject framing.

- 10-bit 4:2:2 internal recording for rich colour depth
- Fast hybrid autofocus for sharp, reliable focus in dynamic settings
- Paired with **Hollyland 4K Wireless Video Transmission System** for real-time, cable-free monitoring and feeds directly to the video switcher

• Blackmagic Pocket Cinema Camera 4K (BMPCC 4K)

Professional cinema-grade camera ideal for capturing B-roll, creative cutaways, or wide shots.

- Delivers high dynamic range and exceptional low-light performance
- Shoots in ProRes or RAW for maximum post-production flexibility
- Ideal for stylized content, product visuals, or dramatic multi-angle setups

PTZ Camera Integration (SDI/HDMI)

Support for fully controllable Pan-Tilt-Zoom (PTZ) cameras across both SDI and HDMI workflows.

- Remote operation enables smooth transitions and dynamic angle changes
- Suited for events, panel discussions, or static wide-room coverage
- Compatible with most professional-grade PTZ systems

Live Streaming & Video Mixing Capabilities

• Video Mixer / Live Switcher

A professional multi-input video switcher for seamless live production workflows.

- Supports real-time camera switching, video transitions, graphic overlays, and lower-thirds
- Direct live-streaming integration to platforms like YouTube Live, Facebook Live, Twitch, and
 Zoom
- Mixes in pre-recorded media, titles, and branding for polished presentation

• Streaming-Ready Infrastructure

- RTMP-compatible for flexible platform streaming
- Integrated with audio interface for perfect A/V sync
- Option to record stream locally for post-event editing or redistribution

Additional Features & Workflow Enhancements

• Multi-Camera Recording with Timecode Sync

Ensures post-production alignment between multiple camera feeds and external audio devices

Mobile / On-Location Production Support

Portable gear and battery-powered options allow for full remote setup — indoors or outdoors

Green Screen / Virtual Background Support

Chroma key capabilities enable branded or creative digital backdrops in real time or in post

Real-Time Audio Mixing

Live sound control via dedicated mixer with individual mic level adjustments, EQ, and effects

Redundant Recording Systems

Simultaneous backup recording of both video and audio to prevent data loss during live sessions

Perfect For:

- Podcast Productions Solo creators or group formats with high-end video and audio
- Video Podcasts (Vodcasts) Full cinematic look with clean audio, overlays, and branding
- Livestream Events / Webinars Corporate communications, virtual events, or town halls
- Panel Discussions & Interviews Multi-angle coverage with remote PTZ and live switching
- Behind-the-Scenes Content Capture secondary footage for BTS reels or promotional cuts
- Educational / Corporate Media Training videos, internal communications, or branded content

Why Our Gear Matters to You

We don't just press record — we craft content that *feels* cinematic. With the **Sony A7 IV**, you're guaranteed:

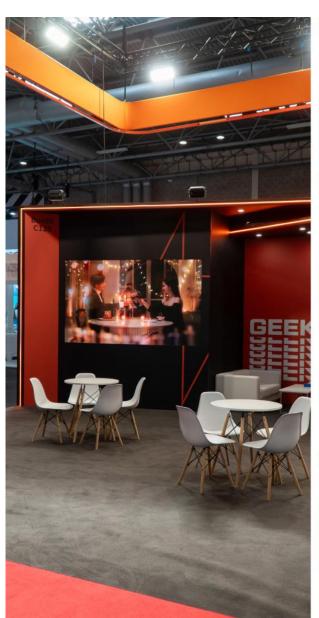

- Ultra-HD detail
- Hollywood-style depth & colour
- Noise-free low-light performance
- Pin-sharp focus every time

Pair that with the **RØDE Wireless GO II Pro system**, and your audio sounds as crisp as it looks — whether it's a wedding vow, brand message, or behind-the-scenes interview. No wires, no limits — just **clean, pro-grade sound**.
